

Pend Oreille Conservation District

State Legislative District #7
Congressional District #5

Other Accomplishments

Demonstration Rain Garden

Exclusion Fencing

5th Grade Water Festival

2008 Feature Accomplishment

Riparian Restoration

Resource Challenge

With the increasing development on the shores of Pend Oreille County's waterways, bank erosion/stabilization has become a concern.

Project Summary and Results

Pend Oreille Conservation District hired Dale Miller of Main Stream Restoration Inc. to conduct a Riverbank Stabilization Guidelines education workshop and tour for agencies, contractors, consultants and landowners.

The overwhelming response from this workshop encouraged the Watershed Implementation Team (WRIA 62) to offer a Pend Oreille Shoreline Bank Stabilization Workshop. A total of 113 landowners attended the day-long workshop. Ninety percent indicated interest in implementing bank stabilization techniques found in the Riverbank Stabilization Guidelines.
